

**Open-source powered** platform-as-a-service product to provide cloud functionality on edge computers. Supports seamless integration into your current **CI/CD** setup

- Cloud **provider independent** (AWS, GCP, Azure, openStack) or on-premise
- Super **slim run-time** on edge nodes
- Rich vehicle API to address interfacing to on-vehicle systems and hardware

- Runs on any hardware that supports modern Linux (kernel 3.1+)
- Sophisticated security concept built on **GPG encrypted communication**
- **Single click deployment** of software to full fleet
- Certifiable to **EN 61508 SIL 2**, extendable to **SIL 4**
- Available to
  - integrate into system integrator product suites, or
  - to establish an open edge hosting framework for any vehicle, under **full control** of the transport operator

**Completely vendor-independent, cloud provider-independent and hardware agnostic**
